100% RECYCLABLE

DESIGNER NOTES

This all-aluminum bench is a new take on the Rutherford series, one of our most specified product categories. Though it keeps with the same design, this new version now offers a fresh and modern look with the omission of recycled plastic and the addition of aluminum seats and backrests. The panels can be powder coated in a different colour than the frame, opening up plenty of style options. The all-aluminum design also brings with it the benefit of being half the weight of the original version, making it easy to move around for application where it does not need to be secured to the ground. At times where budget is limited, this cost-effective bench creates a stylish look without sacrificing quality.

100% Canadian Made
